

**PERATURAN PEMARKAHAN  
UJIAN AMALI SAINS - KIMIA  
TINGKATAN 5**

Soalan	Peraturan Pemarkahan	Skor
1 (a)	Able to record all readings accurately to one decimal point with correct unit.  Answer :  Set I : [ X saat/second ] Set II : [ Y saat/second ]	1 1

Question	Mark Scheme	Score
1 (b) (i)	Able to state the colour of precipitate.  Answer :  Kuning / Yellow	1

Question	Mark Scheme	Score
1 (b) (ii)	Able to state the inference accordingly.  Sample answer :  1. Sulfur / Sulphur	1

Question	Mark Scheme	Score
2 (c)	Able to state the three variables correctly.  Sample answer :  (i) Pemboleh ubah dimanipulasi : bilangan mol ion tiosulfat/natrium sulfat// Isipadu dan kepekatan larutan natrium tiosulfat (ii) Pemboleh ubah bergerak balas : Masa untuk tanda X tidak kelihatan// kadar tindak balas. (iii) Pemboleh ubah dimalarkan : Isipadu dan kepekatan asid sulfurik  (i) <i>Manipulated variable: no. of mole thiosulphate ion/sodium thiosulphate// volume and concentration of sodium thiosulphate</i> (ii) <i>Responding variable: Time to X mark disappeared//Rate of reaction.</i> (iii) <i>Constant variable: Volume and concentration of sulphuric acid</i>	1 1 1  1 1

Question	Mark Scheme	Score
1 (d)	Able to state the relationship between the manipulated variable and responding variable correctly.  Sample answer :  Semakin tinggi kepekatan natrium tiosulfat yang digunakan, semakin singkat masa yang diambil untuk tanda X tidak kelihatan  <i>The higher concentration of sodium thiosulphate, the shorter time taken for X mark disappeared.</i>	2
